

## About Me

I'm a motivated web developer with a strong foundation in frontend development, some backend experience, problem-solving, and teamwork. I've launched and managed business websites with a focus on user experience and functionality. I developed a Unity game project using my moderate C# knowledge picking up a new environment to learn in quickly. Seeking a role as a Junior Frontend/Full stack developer or similar to apply my skills in software development while delivering client-focused solutions.

## Work Experience

### Bradleys Antique Packing Services Ltd

Packer

I work as part of a team, taking individual responsibility for packing antiques. I prioritise safety, attention to detail, and ensuring the pristine condition of each item for delivery. My role involves careful handling, meticulous packing, and contributing to the team's overall efficiency in achieving successful, secure deliveries.

C#	<div></div>
Python	<div></div>

## Projects

### Bradley's Ltd

<https://bradleys.ltd/>

I updated the main website for the company that I work for, updating the information, adding new features such as a calculator using Google Maps API for estimating price of furniture delivery, which lead to me now managing the sites, excl. the DNS.

### SHDE music

<https://shdemusic.com/>

I designed and developed the website for this local music artist which I constantly update with new information such as upcoming events, songs, popups etc. There is a feature for fans at shows to submit photos and see all fan photos after they have been reviewed. I manage the site's hosting and its DNS, and the details on the website.
